

# eBooks for Nook, Kobo & Sony

The Maine State Library and 140 other Maine libraries joined together to purchase the **Maine InfoNet Download Library**, a 2,600+ collection of eBooks to “borrow” onto your own eReader devices free of charge. This collection is from **Overdrive**, the current leader in the eBook lending market. The eBooks come in ePub format and can be read on your computer or transferred to your **Nook, Kobo, Sony** and more.\*

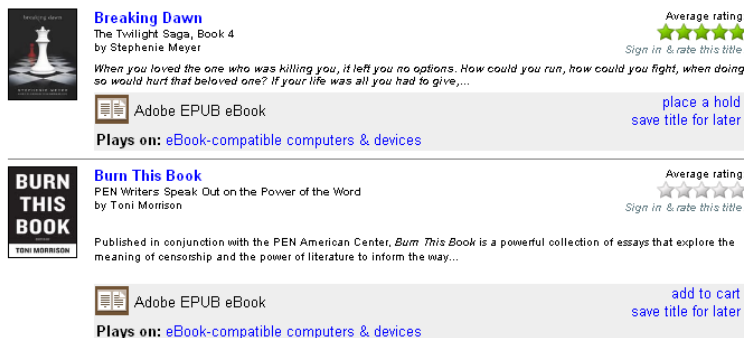

Anyone with a **Maine State Library card** or a **card from a participating Maine library** can access this collection, so grab your library card and let's get started!

## Step 1: Download Adobe Digital Editions (ADE) Software to your computer. (You only need to do this once per computer.)

- Visit the Maine InfoNet Download Library at <http://download.maineinfonet.org>.
- Click on **Quick Start Guide** to download the ADE software.
- Adobe will prompt you to create a **free** Adobe ID. You need this unique ID to transfer content to your device. **Note!** You can use ADE anonymously, but you will only be able to read eBooks on your computer, **not transfer them to your device.**
- Once you launch the ADE software, it will prompt you to authorize your computer.

## Step 2: Check-out the eBook you want from the Overdrive site. (limit 3 eBooks at a time)

- When you have added eBooks into your cart, click **Proceed to Checkout.**
- Select **Maine State Library** or **your own library** and type your library card number at the prompts. For the Maine State Library, this is the **barcode** on the back of the card.
- At the Check-Out screen, select the 7 or 14 day loan period from the drop-down menu, and then click **Confirm to Check Out.**

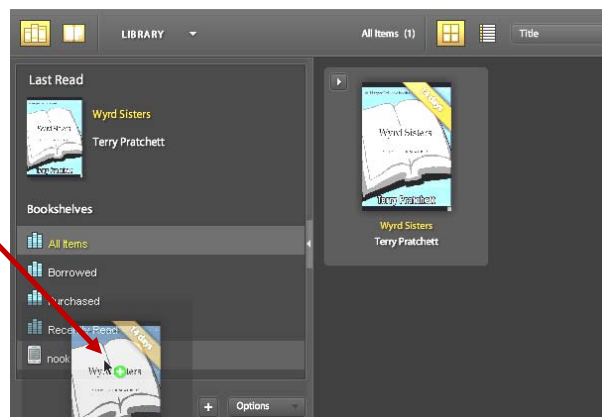

### Step 3: Download and read your eBook in ADE. (limit 3 eBooks at a time)

- Click **Download This Item** into ADE on your computer.
- If ADE does not open automatically; launch it from your Programs menu.
- If ADE opens but the item is not showing, click on **Library** at the top of the ADE window.

### Step 4: Transfer your eBook from your computer to your eReader device.

- Connect your device to your computer via the USB port and cable.
- Open Adobe Digital Editions (ADE) on your computer. **Note!** You must activate both ADE and your device with the **same Adobe ID** to successfully transfer content.
- When Adobe recognizes your device, it will prompt you to authorize this device (like you did with your computer). If you already used a different Adobe ID on the device, it will prompt you to login with the same ID.
- An icon for your device will then appear in the left column under **Bookshelves**.
- Click and drag the eBook graphic from the right-hand box of your **Library** to the device icon and then let go (a green + icon appears).
- If the eBook doesn't automatically show on your device, you may need to check for new content. For example, on a Nook, select **My Documents**, then **Check for new content**.

### Due Dates and Returns

- Your eBook is **due** either 7 or 14 days after you check it out, depending on which option you chose at the check-out screen. In Adobe Digital Editions (ADE), a diagonal ribbon across the book cover shows the remaining check-out days.)
- If you finish sooner than the due date, you **can check in the item early** to be eligible to check out another eBook (remember, 3 eBooks max). Once you return the eBook from your ADE library, it is removed from your computer, but it remains on your eReader device and you can continue reading it for the remaining loan period.
- To check in the eBook, go to Adobe Digital Editions on your computer, and in the **Book Cover** view of your Library, click once on the item you want to return. Then click the arrow near the upper left corner of the book cover and choose **Return Borrowed Item** from the short menu. If you wait until the eBook expires, the file remains in ADE and on your reader in an unreadable form (the diagonal ribbon says **Expired**) so you will want to delete it.

\* **iPads and smartphones:** these steps can be skipped completely and eBooks can be directly downloaded using the Overdrive app for each device which can be found on each device's website.
